THEMATIC AREA - ORAL AND MAXILLOFACIAL RADIOLOGY

Thematic Area	**ORAL AND MAXILLOFACIAL RADIOLOGY**
Description	Oral and maxillofacial radiology is that branch and specialty of dentistry concerned with the production and interpretation of radiographic images, including CT and MRI scans that are used for the diagnosis and management of diseases, disorders and conditions of the mouth, face and jaws. An oral and maxillofacial radiologist is a dentist who studies and interprets radiographic images for conditions affecting the head, neck, face and jaws. To become an OMR, a dentist must complete a postgraduate degree program. This training includes thorough knowledge on techniques and interpretation of maxillofacial CT, CBCT, MRI, ultrasound and other pertinent modalities
Head of Thematic Area	**DR. TOM J. OCHOLLA**
Staff	**DR. EUNICE KIHARA** **DR. FLORENCE OPONDO**
Programmes	Undergraduate Graduate
Career Opportunities	There are great opportunities for one wishing to specialize in Oral and Maxillofacial Radiology. Employment opportunities exist within the major hospitals, dental schools, and in the armed forces medical services. Alternatively specialists can open their own private consultancies.
